When you rent or buy equipment from Ramirent, remember also site design. Ramirent's design services help you see in advance what your sites needs and challenges will be. With design services you can make sure that the equipment you select for your work site, will be safe and efficient.

With years of experience we can make sure that all work safety details have been taken in to consideration and the site fills the current industry requirements.

From Ramirent you get expert service and as per your needs 2D, BIM or 4D designs.

Ramirent design services are available all over Finland!
